

United Insurance Brokers Ltd
Heavy Industries

Heavy Industry refers to the processing of raw materials to a usable form such as aluminium, iron and steel.

Our policies are bespoke and tailored from the ground up to meet all the operational needs of our client. Whether this be the cover of integral items such as boilers, conveyors, electric arc and blast furnaces, coke ovens, rolling mills and kilns.

Within the Property Team at UIB we have brought together a number of extremely skilled individuals each with their own specialised abilities in the Property field, giving us a varied and in-depth knowledge base and Market experience, something we believe has helped us to excel and stand out from our competitors in this challenging class of business.

We have the expertise to manage complex challenges and the ability to negotiate the most competitive quotes.

UIB provides the range of capabilities and essential services to meet your long-term insurance and risk management needs.

Coverages available

- All risks of physical loss or damage
- Business Interruption
- Machinery Breakdown plus Business Interruption following
- Contingent Business Interruption (Customers and Suppliers extension)
- Natural Perils
- Public and Employers Liability
- Political Violence / Sabotage / Terrorism / Strike Riot and Civil Commotion / War and Civil War
- Construction

“ Our policies are bespoke and tailored from the ground up to meet all the operational needs of our Client. ”

Service offered

The scale and diversity of these projects often requires an insurance broker with global capabilities. UIB, with an international network of offices and strong relationships with insurers worldwide, draws on many years of experience to address complex risk issues and develop comprehensive and cost-effective risk and insurance solutions.

The non-marine property team is highly experienced in working in politically sensitive and difficult regions. To supplement our expertise, our primary technical risk surveys are carried out internally by Engineering Risk Consultants (ERC), a leading international risk surveyor who can be used for technical assistance to the broking team and also carry out risk management for our clients.

United Insurance Brokers as a group is extremely proud of the service standards we provide to our clients and this is further enhanced in the Property Division with the engineering support and claims team all sitting on the same floor in the London head office. UIB does not outsource any of its claims services to overseas independent companies in order to simply cut costs, unlike the majority of our competitors.
